PRASAD JAMBHALE

Technical Lead | Senior ITIL & Cloud Infrastructure Support Engineer

Maharashtra, India (Open to Pan-India & Remote) | Phone: +91 8766992177 | Email: jambhaleprasad600@gmail.com

PROFESSIONAL SUMMARY

Results-driven **Technical Lead and ITIL Support Engineer** with **4.5+ years of experience** at **Cognizant Technology Solutions**, specializing in Microsoft Azure Server Support, Linux/Unix and Windows Administration, Python Automation, and SQL Database Management. Proven track record in end-to-end IT Service Management (ITSM), driving Major Incident, Problem, and Change Management workflows for global enterprise clients across the Banking, Energy, and Industrial sectors. Experienced in leading a 5-member technical support team, managing multi-vendor SLAs, reducing Mean Time to Resolution (MTTR), and leveraging Generative AI (**2x Anthropic Claude AI Certified**) to optimize operational efficiency and system uptime.

CORE TECHNICAL COMPETENCIES

- **Cloud & Server Infrastructure:** Microsoft Azure (IaaS, Virtual Machines, Azure Monitor, Log Analytics, Backup & Recovery), Linux (RHEL, Ubuntu, CentOS), Unix, Windows Server Administration
- **Scripting & Databases:** Python (Task Automation, Log Parsing, Health Checks), SQL (Complex Queries, Joins, Data Validation, Performance Troubleshooting), Bash / Shell Scripting
- **IT Service Management (ITSM):** ITIL Framework, Major Incident Management (P1/P2 Bridges), Problem Management (RCA / CAPA), Change Management (CAB Governance), SLA & KPI Compliance, ServiceNow
- **Leadership & Operations:** Technical Team Leadership (5 Engineers), Third-Party Vendor Management, Escalation Handling, Shift Roster & Handover Governance, KEDB & SOP Documentation
- **AI & Process Innovation:** Anthropic Claude AI (2x Certified), Prompt Engineering for IT Operations, Automated Runbook & RCA Generation

PROFESSIONAL WORK EXPERIENCE

Cognizant Technology Solutions – ITIL Support Engineer / Technical Lead — May 2022 – Present

- **Team Leadership & SLA Governance:** Lead, mentor, and manage a 5-member technical support team across 24x7 enterprise production environments, consistently achieving **99.5%+ SLA compliance** for P1/P2 incidents and service requests.
- **Azure & Hybrid Server Support:** Administer, monitor, and troubleshoot enterprise server workloads across **Microsoft Azure, Linux/Unix, and Windows** platforms, ensuring high availability, patch compliance, and proactive capacity management.
- **Incident, Problem & Change Management:** Serve as primary technical escalation point for Major Incident bridges; drive Root Cause Analysis (RCA) and permanent preventive fixes, reducing recurring incident volume by **25%+**.
- **Python Automation & SQL Diagnostics:** Develop Python scripts to automate routine server health checks, log parsing, and alert triaging; write complex SQL queries to resolve backend data issues and validate enterprise application states.
- **Vendor & Stakeholder Management:** Coordinate directly with third-party software/hardware vendors, cloud providers, and client Change Advisory Boards (CAB) to execute zero-downtime deployments and resolve external dependencies.

Key Enterprise Client Engagements at Cognizant:

- **Duke Energy (Energy & Utilities Infrastructure Support):** Led L2/L3 infrastructure and server support across mission-critical Azure and Linux/Unix environments. Managed high-priority outage bridges, coordinated third-party vendor escalations, and enforced strict ITIL Change Management governance.
- **Credit Suisse (Global Banking & Financial Services Operations):** Delivered high-availability production support within a strictly regulated financial environment. Executed complex SQL diagnostics, Unix server troubleshooting, batch job monitoring, and Python log automation to protect critical banking workflows.
- **Eriks (Industrial Services & Supply Chain Operations):** Directed end-to-end ITIL service delivery, Windows and Linux server administration, and database issue resolution. Authored standardized SOPs and Known Error Database (KEDB) articles, accelerating L1/L2 ticket resolution times.
